

# Deities

The seventeen gods make up the Pantheon of Geb. The [religion](#) of Geb is such that most people pay reverence and respect to all seventeen. An individual or [settlements](#) having a one or more patron deities is common. Worship of [false gods](#) is not unheard of in the wildlands.

**Each deity's alignment is listed, followed by alignments accepted by that deity as clerics (in parenthesis).** Only clerics and paladins must have a patron deity whose parenthetical alignments match the character's. Paladins will never choose a patron deity whose parenthetical alignments do not include LG.

Worshippers of gods need not meet the clerical alignment requirements – deities will accept the worship of anyone. [Alignment](#) is a cosmic conflict in which the common person is not directly involved.
